

CLAIMS

What is claimed is:

1. An intervertebral spacer, comprising a spacer body having a porous surface and a beveled edge.
2. The intervertebral spacer of claim 1, wherein the spacer body has diametrically tapered upper and lower surfaces.
3. The intervertebral spacer of claim 2, wherein the spacer body has at least two relative angle designation marks on at least one of the upper and lower surfaces.
4. An intervertebral spacer, comprising a spacer body having a porous surface and an axially medial groove.
5. The intervertebral spacer of claim 4, wherein the axially medial groove comprises a constant width.
6. The intervertebral spacer of claim 4, wherein the axially medial groove is tapered.
7. The intervertebral spacer of claim 4, wherein the spacer body has diametrically tapered upper and lower surfaces.
8. The intervertebral spacer of claim 7, wherein the spacer body at least two relative angle designation marks on at least one of the upper and lower surfaces.
9. An intervertebral implant, comprising a spacer body having at least one of a beveled edge and an axially medial groove.
10. The intervertebral implant of claim 9, wherein the spacer body has diametrically tapered upper and lower surfaces.

11. The intervertebral implant of claim 10, wherein the spacer body has at least two relative angle designation marks on at least one of the upper and lower surfaces.
12. The intervertebral implant of claim 11, wherein the axially medial groove comprises a constant width.
13. The intervertebral implant of claim 11, wherein the axially medial groove is tapered.
